

SEDOTS: Driving Innovation – Driving Businesses

As mobile devices become the primary mode of accessing enterprise data, organizations need end-to-end solutions addressing a particular business function / process which are tailored exclusively around mobile devices. Hyderabad headquartered SEDOTS, has developed a range of products for a spectrum of industry verticals while bringing forth services such as custom enterprise software, mobile application development, IT infrastructure, business consulting, training and skill development services, project management and business advisory services for its clients.

In developing any software project execution models, the team at SEDOTS adheres to the international standards such as CMMI-SW, Rational Unified Process and ISO 9001:2000 to make the project flow seamless and lucid for the client. Enterprise applications have become integral to every company's digital strategy, irrespective of its size or area of operations. Understanding the predicament, SEDOTS application software provides business logic support functionality for an organization, typically in commercial organizations, which can improve business productivity and efficiency. Services provided by this software are conventionally business-oriented tools such as online shopping, online payment processing, interactive product catalogues and automated billing systems to name a few. SEDOTS voyage in application development started with the product iPalm ERP. iPalm is a comprehensive ERP solution built to handle complete palm operations right from procurement to end sales. The product has earned satisfactory appreciations from deployments in more than 6 large Agro companies, including Ruchisoya Industries, 3F Oil Palm, Radhika Group, Subramaneswara Agros and Apoilfed, among others. SEDOTS other ERP's Include: SEEDSGROW ERP, iInfra ERP, SMOS Media ERP,

SEDOTS Mobile Solutions for Enterprises

As mobile applications have become ubiquitous, spanning over the entertainment industry, business applications and location based services, SEDOTS' vast stretched practice in mobile solutions has promoted the

company to the top in the mobile application software domain for both consumers and clients. SEDOTS mobile apps like, LOCATE VTS, Media-Tag, FIR app, iAgro-GeoTag

app, People Reporter app and many more are available on Playstore & Appstores, are providing to enrich experience for our Enterprise Clients. SEDOTS Mobile Marketing Services(Mobile4ad.com) has been rendered to many toppharma companies of India, including Abbott, Zydus Cadila, DR Reddys, Allergan etc.

“As the Mobile Application development ecosystem develops and matures, we see with skills ranging from production and management of multimedia data on handsets, to the implementation of full-scale solutions that include complicated server-side modules, we have gathered extensive expertise in developing handset software for business and entertainment consumer markets”, says Prashanth Bairy, MD, SEDOTS. Moreover, with greater penetration of smart mobile phones in the market globally, there is a notion to enhance the data availability, inter-operability and flow of data across various devices to instill better business performance. Meeting this demand, the company has built the enterprise solutions M-Commerce ready by introducing online payment options and expanding the availability to various platforms- Android, iOS and Windows.

SEDOTS' SaaS, Platform independent and Device independent solutions have always been the company's avant-garde strategy for retaining and expanding its clientele. With the ability to execute deployments in the shortest time possible, the company has proven its strength and intends to dive into wearable devices and Artificial Intelligence product markets in the near future.
